# Attributsetvorlage für Bimplus Projekt festlegen

You define the property set template that is mandatory for a construction project in the **Project settings**.

### To define the property set template for a Bimplus project

**This is only possible if ...**

You are signed in to the **BIMPLUS** web portal (see “Signing in to the **BIMPLUS** web portal“)
You have the required rights (see “Rights in Bimplus”)

1. Make sure the required project is the current project (see “Selecting the current Bimplus project”).
2. Select the navigation menu by clicking **Show navigation menu** on the title bar of the **BIMPLUS** web portal.
3. Click **Project settings**.
4. Select the required property set template by using the **Property set template** list box in the **Assigned property set template** area.
