

# Attributsetvorlage für Bimplus Projekt festlegen

You define the property set template that is mandatory for a construction project in the **Project settings**.

## To define the property set template for a Bimplus project

This is only possible if ...

You are signed in to the **BIMPLUS** web portal (see “[Signing in to the BIMPLUS web portal](#)”)  
You have the required rights (see “[Rights in Bimplus](#)”)

1. Make sure the required project is the current project (see “[Selecting the current Bimplus project](#)”).
2. Select the navigation menu by clicking  **Show navigation menu** on the title bar of the **BIMPLUS** web portal.
3. Click  **Project settings**.
4. Select the required property set template by using the **Property set template** list box in the **Assigned property set template** area.
