Release Notes

Release notes (change log) of the production server deployment

Click here to visit new **BIMPLUS RELEASE NOTES** page.

Deployment on 03.02.2021

[Major new features]

#IFC Export of selected Objects by Filter (Export manager)
#Custom color picker (Bimexplorer)
#Possibilty to define and add custom issue attributes (Property manager, Bimexplorer)
#Model revision description (Bimexplorer, Portal)

[Minor new features]

34 minor bugs were fixed

Deployment on 10.12.2020

[Major new features]

#Isolate views in own floating menu (Bimexplorer)
#Sections floating menu with planes selection (Bimexplorer)
#Measure functions + measure units as floating menu icons (Bimexplorer)
#All models in topology sorted in alphabetical order
#Free measurement extended with slope gradient value
#Performance improvement: API call for large scale projects
#Performance improvement: Significant improvement of Object navigator filter tree results

[Minor new features]

64 minor bugs were fixed

Deployment on 21.10.2020

[Major new features]

Unified Account management via Allplan Connect
Performance improvements in IFC Model import
Performance improvements when processing large data
BIMAR - Partner Application release - ordering from Bimplus Dashboard
Bimplus Explorer 3D View - Section Geometry processing improvements
9 major bugs were fixed

[Minor new features]

18 minor bugs were fixed

Deployment on 1.10.2020

[Major new features]

BIMEXPLORER 3D Scene settings – setup background color and light conditions
Redesign of left and right panesl action buttons (save, edit, publish etc.) – buttons are placed in top of the panels for ease of use
Object navigator WYSIWYG - Only models/objects currently activated in project navigation are visible in object navigator results
9 major bugs were fixed

[Minor new features]

Bugfixes for issue manager
Bugfixes display of center menu in Tablet
12 minor bugs were fixed

Deployment on 16.09.2020

[Major new features]

Task navigator – new update including advanced task filtering and task publishing. Organize and manage tasks way you want.
Task filter – create task filters with powerful filter builder. You can filter by multiple criteria, with text and date range search.
Task publishing – each new task is considered as a draft and it is assigned only after publishing.|
Task Navigator in Allplan – new update which brings advanced task filtering, task publishing, BCF export/import to Allplan
Task Navigator in Revit Plugin – new update which brings advanced task filtering, task publishing, BCF export/import to Allplan
Multi-edit of tasks – now you can save time with bulk operations. Select multiple tasks and change their status, responsible or delete them.
Task table update – possibility to choose visible task columns, reorder task columns, task picture in table
Task viewers - you can invite project member as task viewer who can view/comment on the task, however is not responsible.
Remember last selected model in portal
Remember last selected project member in portal
Task scene switch – Possibility to switch between task scene and model scene
11 major bugs were fixed

[Minor new features]

Documents in demo projects bugfixing
39 minor issues were fixed

Deployment on 13.08.2020

[Major new features]

Document management rights – possibility to set access to document folders per project member
Documents sharing – documents have now draft and shared mode. Only valid shared documents are accessible to all
Document versions sharing – decide which document version is shared with rest of the team
Document folder has properties
New Version of the Excel Plug-in
15 major bugs were fixed

[Minor new features]

Automatic notifications previews now shows only for the first time
Document folders tiles improved GUI
New array attribute – usage material thickens to composite wall as a set of values comping from IFC (IFCMaterialLayer)
26 minor issues were fixed

Deployment on 04.06.2020

[Major new features]

New License policy released
Revision creation performance improvements
New Version of the Excel Plug-in
12 major bugs were fixed

[Minor new features]

16 minor issues were fixed

Deployment on 21.5.2020

[Major new features]

2 major bugs were fixed

[Minor new features]

Pset ordering remembered
Delete project, model, document and user picture from project and team
13 minor issues were fixed

Deployment on 4.5.2020

[Major new features]

Notification center – aggregated user friendly messages
Parallel pair of section planes – activate parallel sections in section settings
Rename document via context menu
Show documents sub folders in table view
Bim Explorer – load geometry via glTF (more info https://en.wikipedia.org/wiki/GlTF)
6 major bugs were fixed

[Minor new features]

Waterfox Browser not supported anymore
support for Opera Browser added
Improvement of revision creation from portal
Multi model/Schedule manager App – updated context menu
12 minor bugs were fixed

Deployment on 15.4.2020

[Major new features]
Open project in BIM Explorer from left panel – double click on project image loads project in BIM Explorer
Open document by double click
Clash detection with custom filter – create own clash filters using object attributes - see also What's New Page in Dashboard
Export to IFC available to all users
Change team name in account settings (account owner)
Display used storage in Project/Team on the dashboard
BIM Explorer help hint for 0 active models – activate model if there were no models
BIM Explorer help hint 0 models – if user has no models in project, he/she is informed where to upload models
New dialog for section settings
Flip section
Sketchup import - support for the latest Sketchup version
16 major bugs were fixed

[Minor new features]
Mailto links for emails in portal
Fix of incorrect views in slideshows
User properties displayed in others group
Improvements of Sketchup file import
Bugfixing move model
What's new increased size of font
Clean cache control
Section view performance
22 minor bugs were fixed

Deployment on 27.2.2020

[Major new features]

Update of clash detection – run calculation for selected building topology
Folder navigation – navigate between documents like in windows explorer
Breadrumbs – dynamic breadcrumbs navigation on tablet/desktop in projects/models/documents/members
Visualisation of the cutting edge with colour for fills
19 major bugs were fixed

[Minor new features]

12 minor bugs were fixed

Deployment on 22.1.2020

[Major new features]

Extended measuring – measure angles by 3 points
Progressive Web Application support – use Bimplus as standalone application on Desktop/Tablet
Revision icon reflects status of revision
19 major bugs were fixed

[Minor new features]

#Support move view by middle mouse button / pressed wheel
11 minor bugs were fixed

Deployment on 14.1.2020

[Major new features]

Responsive BIMPLUS design, better user experience on tablets
Updated dashboard with most important project information
Advanced free and angle measuring in BIMEXPLORER
Multiupload of documents/models to BIMPLUS
Project settings page with project properties template assignment
19 major bugs were fixed
Breadcrumb navigation
Launch apps from BIMEXPLORER via burger menu

[Minor new features]

13 minor bugs were fixed

Deployment on 10.10.2019

[Major new features]

Bimplus Viewer Navigation Map
Performance - Model import improved up to 10%
LandXML import - error and report log
BCF collaboration improvements (clipping plane, sections)
"Gimbal lock" in Scene Object issue fixed
9 major bugs were fixed

[Minor new features]

11 minor bugs were fixed

Deployment on 09.07.2019

[Major new features]

Optional scene loading
Modal dialogues handling via keyboard
Context menu improvements
12 major bugs were fixed

[Minor new features]

Object navigator UX – visual improvements to improve ease of use
Bug-fixes Revision Compare App
Bug-fixes Schedule Simulation
9 minor bugs were fixed

Deployment on 13.06.2019

[Major new features]

Multi-select objects by filter criteria – Bulk selection of objects for Multimodel Manager and Schedule Simulation
Modal dialogues handling via keyboard
Context menu improvements
17 major bugs were fixed

[Minor new features]

Object navigator UX – visual improvements to improve ease of use
Bug-fixes Revision Compare App
Bug-fixes Schedule Simulation
14 minor bugs were fixed

Deployment on 07.03.2019

[Major new features]

BCF 2.1 import/export support
Assign attributes also to child objects
Direct share link to exported IFC file
Imperial units support in Bimplus Explorer and related Apps
Bimplus Explorer renderer improvements (zooming, panning, opacity, transparency, object selection and their combinations)
Search support in Task Navigator
11 major bugs were fixed

[Minor new features]

13 minor bugs were fixed

Deployment on 06.02.2019

[Major new features]

BCF 2.1 import
Revision comparison with Object Filter
Sorting Object Filter results according the Building Structure(Topology)
Export Tasks to Excel with direct Bimplus link
UI improvements
19 major bugs were fixed

[Minor new features]

24 minor bugs were fixed

Deployment on 12.11.2018

[Major new features]

New Version of Revit Add-In, Excel Add-In and MS Project-Add-In with notification system for free download
Object Filter with Attribute values
Property manager improvements
New Country USA
Improved support for MS Edge Browser
Simplified invitation process
14 major bugs were fixed

[Minor new features]

17 minor bugs were fixed

Deployment on 19.09.2018

[Major new features]

New Version of Revit Add-In for free download
New fast searching inside Property manager
New "Contact us" Button worldwide
3 major bugs were fixed

[Minor new features]

4 minor bugs were fixed

Deployment on 14.09.2018

[Major new features]

New! BIMPLUS Dashboard page with Bimplus apps tutorials and videos
Project info page with project and tasks overview
Possibility to download MS Excel Add-in, MS Project Add-in , Bimplus Revit Add-in
Info panel within BIMPLUS Dashboard with latest news
5 major bugs were fixed

[Minor new features]

9 minor bugs were fixed

Deployment on 26.07.2018

[Major new features]

Accentuated the work in progress state for Model Import
Allplan Project Import show upload state in Portal
Enable login button when user enters new credentials after failed login
Improved colour picker handling
Improved filter handling - remember last user setting
Property manager - Content Attributes (Bimplus Database) ordered according Disciplines
Property manager - Attribute properties visible via Info button
Move model - Input the vector as numeric delta value
Fixed Issue with invitation of the new user into Project (Project membership and visibility)
IFC Export always according IFC Advanced Project Template to keep the Attribute Schema according © buildingSMART pSets definition
General MEP discipline divided to Heating, Cooling, Ventilation, Plumbing, Electrical, Sprinkler and MEP Common according the © buildingSMART element types assignment
8 major bugs were fixed

[Minor new features]

7 minor bugs were fixed

Deployment on 11.07.2018

[Major new features]

New Version of MS Excel Plugin (fixed problem with localized list separator for drop downs)
New Version of MS Project Plugin
Authorization - fixed problem with invalid state after clear cache
Revision Comparison - performance improvement for loading revision objects up to 25%
Fixed wrong cache content problem for Clash Detection
6 usability improvements based on the customer feedback were implemented (Property Manager, Export Manager, Task Manager)
9 major bugs were fixed

[Minor new features]

14 minor bugs were fixed

Deployment on 25.06.2018

[Major new features]

General Performance improvement 20 %
Localisation Round Trip
Attributes description extend with Standard IFC Attribute
Imperial units considered for IFC import
9 usability improvements based on the customer feedback were implemented (Object properties, Object Filter, Slide Show and Export Manager)
13 major bugs were fixed

[Minor new features]

21 minor bugs were fixed

Deployment on 09.05.2018

[Major new features]

Performance improvement for Users, Teams and Projects overview up to 10 %
Localisation Round Trip
Terms and Conditions Update
BCF exchange format usability extensions
14 usability improvements based on the customer feedback were implemented (Revision Comparison, Object Filter, Clash Detection and Schedule Viewer)
9 major bugs were fixed

[Minor new features]

12 minor bugs were fixed

Deployment on 11.4.2018

[Major new features]

New Module Export Manager as free Trial
Performance improvement overall the whole Portal up to 12 % (ratio is increasing with Project complexity)
Downloadable full import log for IFC Import
Usability improvements - 10 usability improvements based on the customer feedback were implemented
Major bug fixing - 18 major bugs have been fixed

[Minor new features]

Minor bug fixing - 7 minor bugs and problems have been fixed

Deployment on 16.3.2018

[Major new features]

Overall Performance improvement up to 10%
Security robustness improvements
Localisation round trip
Usability improvements - 11 usability improvements based on the customer feedback were implemented
Major bug fixing - 11 major bugs have been fixed

[Minor new features]

Minor bug fixing - 9 minor bugs and problems have been fixed

Deployment on 23.2.2018

[Major new features]

Unified User Interface
New application Revision comparison (Trial)
New application Sequence manager (Trial)
Attribute sets for Reinforcement according IFC schema
New iOS version on App Store
New Bimplus Excel Add-In Version 1.0.26 on Allplan Shop
Extended API documentation
Usability improvements - 16 usability improvements based on the customer feedback were implemented
Major bug fixing - 11 major bugs have been fixed
Minor bug fixing - 9 minor bugs have been fixed

[Minor new features]

Minor bug fixing - 8 minor bugs and problems have been fixed

Deployment on 7.2.2018

[Major new features]

New design in Bimplus Portal
New version of the Excel Plugin on Shop (1.0.25)
Extended Document filtering
iPad Application UX improvements
Usability improvements - 12 usability improvements based on the customer feedback were implemented
Major bug fixing - 13 major bugs and problems have been fixed

[Minor new features]

Minor bug fixing - 12 minor bugs and problems have been fixed

Deployment on 11.1.2018

[Major new features]

Email notification according the preferred language settings
Improved performance for Allplan Export (together with Allplan 2018-0-3)
IFCMaterialLayer implementation for multilayer elements (Import and Export)
Tasks filtering according Attributes
Extended API documentation
Colour picker transparency slider
Colour picker settings persistence
Buildup (www.buildup.ch) integration for Element Properties
Usability improvements - 8 usability improvements based on the customer feedback were implemented
Major bug fixing - 10 major bugs have been fixed

[Minor new features]

Minor bug fixing - 20 minor bugs and problems have been fixed

Deployment on 19.12. 2017

[Major new features]

IFC export performance improvement up to 80% (ratio is increasing with the model size)
Improved cache handling for object attributes
Multiple BCF download (by filter criteria)
Units added for object attributes
Colour picker for models and layers
Slides show - slides order analogue to Power Point
Localisation round trip
Centre menu adoptions for mobile devices
Filtering for Projects, Models and Documents
Performance improvements for Task up to 30% (ratio is increasing with scene complexity)
Major bug fixing - 14 Major Bugs concerning stability have been fixed

[Minor new features]

Minor Bug fixing - 16 minor bugs improving usability have been fixed

Deployment on 30.11. 2017

[Major new features]

Distance dependent Zoom speed
Attributes handling - performance
New version of the Excel Plugin on Shop (1.0.24)
Tasks management - performance improvements when model updated or revision created
12 usability and performance improvements based on customers feedback
16 Bugs fixed

[Minor new features]

Minor bugfixing -11 minor bugs and problems have been fixed

Deployment on 14.11. 2017

[Major new features]

Object Detail Menu and Attribute Edit Mode – empty Object Attributes are now hidden and only visible if the new Attribute Edit Button is activated.
Multi model upload with extended transfer progress notifications – Allows now the selection and the upload of multiple models
Extended Team Management Module – The new extension now allows the Team Owner and the Administrator to manage subscriptions in a central location.
Direct Connection to Allplan Store
Large number of improvements in terms of efficiency, performance and customer comfort.
Improved Touch Mode and optimized usability of the Bimplus App on iOS
Support for Microsoft Edge Browser
Extended Manual for Bimplus
Performance Improvements when panning and zooming into the active object
Object Navigator and Custom Filter functionality – The custom filter was also optimized. The filer criteria can now be assembled additionally from the properties of a selected object.
Attribute names and the description of Attributes was translated into 8 languages
Property Manager – Improvements in usability and performance
IFC4 extensions - the IFC4 Interface has been extended to reinforcement bars and meshes
Sketchup Interface – the import of Sketchup models retains the original colors of the native objects
Security – from now on, the access to the Bimplus platform is only possible for authorized applications
New WEB SDK with extended documentation published on Github https://github.com/bimplus-admin/bimplus-websdk
Major bugfixing - 17 major bugs in Model upload, 3D Navigator and Virtual Reality App have been fixed

[Minor new features]

Minor bugfixing - 44 minor bugs and problems have been fixed

Deployment on 20.07. 2017

[Major new features]

New iOS version released
New predefined Property sets for Attributes
Performance improvements for huge models up to 20% (depends on model structure)
Lower memory consumption up to 20%
Project Invitations with user defined message
Structure Manager performance improvements up to 50%
Consider language for the attribute filter
Unified Models and Models Topology order
Create custom filter via object attributes
Search inside Task filter
Add another isolation mode which hides all other objects
Major bugfixing

[Minor new features]

Minor bugfixing

Deployment on 29.06.2017

[Major new features]

New Task filter - possibility to filter Tasks and to work without Grid. Especially important for mobile devices.
Major adoptions for mobile devices and iOS devices
Performance improvements for huge models
Improvements in properties manager and properties sets
Improved update of the object property sets after change
New default Property sets for Attributes
Public Documentation improved and updated
Improved cache handling
Major bugfixing

[Minor new features]

Minor bugfixing

Deployment on 05.06.2017

[Major new features]
New Portal and Project management desktop/tablet
View Projects on map and in table
Project properties editing and filtering
Model properties editing and filtering
Documents properties editing, filtering and revisions
Team members administration for account owner
New Properties (attributes) manager for any object type (Project, Model, Document, Building object etc.) as Beta Version
Property sets for any object type (Project, Model, Document, Building object etc.) as Beta Version
New object Navigator with filtering
Significant performance improvements in model upload and model import
Significant performance improvements in model loading
Performance improvements in Document and Attachments handling
Structure manager as Beta Version
IFC 4.0 Export as Beta Version
Handling of outfield models in viewer
Update of Bimplus iOS App
New instruction videos
Major bugfixing

[Minor new features]
Highlight selected object structure in BIM Explorer
Minor bugfixing

Deployment on 12.12.2016

[Major new features]
Sections - easier handling of section planes.
Measuring guideline - measurement is now with guideline and all measurements visible by default.
Sort projects - sort projects alphabetically, date created or modified.
Free attributtes editable in Bimplus Portal and Excel Plugin.
Allplan Export IFC element types support.
IFC import improvements and bugfixing.
Allplan export improvemnt and bugfixing.

[Minor new features]
Improved user menu design.
Bugfixing of BIM viewer center menu buttons.

Deployment on 21.09.2016

[Major new features]
Taskboard - create BCF compatible task with one click including multi object selection.
Allplan Taskboard - Improved GUI of Allplan Taskboard.
New Sections - Enhanced sections allow you to create any desired section plane and select objects in cutted plane.
Mobile web browser support - use Bimplus in field on your iPad or Android tablet.
Multi object preview - select more objects from scene and preview their properties one by one.
Switch to touch - use touch on your touch enabled laptop.
Clashes - new filters
BIF extensions (any CPU, Revisions etc.)
Major & Minor bug fixing

[Minor new features]

Improved colors of text in task details for better usability
New transparent Rights&Roles system for Bimplus Project and Tasks on server/client
Visual improvement of topology and object properties panel
Project editor can upload models and can see project members
Bugfixes of clash detection scene/model
Better responsiveness of bim viewer left and right panel
Public documentation extended

Deployment on 28.07.2016

[Minor new features]

Show progress bar during large revision creation
Show progress bar while is model upload being finished on server
Multilingual support of emails

Deployment on 02.06.2016

[Major new features]

 # Login to Bimplus with Allplan Connect account
 # New languages Italian, Spanish, Czech, Turkish
Welcome screen tutorial

[Minor new features]

Setup welcome screen in account settings
Bugfix clash manager incorrect tollerances setting
Bugfix clash manager incorrect calculation Window/Door
Bugfix MAC OS Safari, incorrect header in webviewer

Deployment on 18.05.2016

[Major new features]

 # Webviewer quick zooming to object hold shift + mouse scroll wheel
 # Project editor can create and upload models!
Fast loading of large models by object decimation
Tasks export/import to BCF, export tasks to excel (Allplan)

[Minor new features]

Bugfixing new slideshow manager
Bugfixing Allplan taskboard (sorting, dates format, selection of tasks...)
Fixed add spot not possible

Deployment on 28.04.2016

[Major new features]

Modernized slideshows manager
New support link for ticket support
Performance - Issues, Issues List, Attachments etc.
IFC import improvements and bugfixing

[Minor new features]

SignalR improvements
Element Decimation part I
Fixed email format bug

Deployment on 07.04.2016

[Major new features]

Clashes as free Beta trial for all users
Overall performance - Dynamic compression and streaming supported on the server - significant performance improvement during loading
Quick zoom to object by double click
Support of Russian language
Release notes notification
Bug fixing

[Minor new features]

Link to shop
Minimalists header - less vertical space occupied
Cursor focus in first input field of forms
Reduction of extra columns in task table

Deployment on 10.03.2016

Server internal Issues (performance, server build, server maintenance, monitoring etc.)
First IFC4 Export prototype based on the Allplan Framework (solution towards "one IFC for all Allplan products")
Minor BCF bugfixing and adoptions
Processes status improved (model import, clash detection)
Terms and Conditions
Third part support (Teams managed externally etc.)
Improved design (Icons, Layout)
Info about browser and system requirements
Portal plugin improvements for Allplan 2017 WIP - Task Board
Other major and minor bugfixing (Portal page, model import, BCF etc.)

Deployment on 11.02.2016

Maintenance release - bugfixes:
(more than 200 bugs fixed, below are only main)

Fixed google chrome problem - not possible to select object!
Support of IFC4 import!
Removed error message if user clicked on object which is in older revision
Improved performance - loading speed of issues and comments
Improved performance - faster loading of project members list and getting user info
Improved performance - faster object loading
Fixed logout
Fixed add pin cursor image on IE
Fixed PRIORITY option translations in issues
Adjust view to visible models
Removed wrong viewbox initialization
Switch off browser level caching of API calls
Center model via bounding sphere + switch of fly-to-animation because of malfunction
Store minimal viewbox for scene without geometry
Show divisions + topology tree despite no disciplines in project (No elements)
Set dimension line symbols initially invisible
Multiselection improvements
Fixed layers visibility when different revision are present and when switching between issues
Fixed missing tooltip in object properties
Added gray background to right menu panel
Fixed missing transparency when model state was restored
Fixed object properties title # Fixed scene setup if issue is active
Dispose pins instead of showing project pins
Adjust viewbox only if issue properties are invisible
Hide and reset issue grid when user navigates out from viewer
Fixed hiding issues grid when object is selected
Don't adjust viewport after switching off the last model
Reset pin selection before creating new issue
Fixed showing all project pins after topic was deleted + fixed showing pins from previous topic when currently selected topic was previously imported from BCF
Fixed selection of single pin in an issue right panel # Refactored notification service - using much less client/server resources

Deployment on 14.12.2015

1. Search issues, documents, models & members
2. Inline editing of model name
3. Updated breadcrumb with link to mange project from BIM Viewer
4. Link to connect. forum from user menu
5. Link to help from user menu (doc.bimplus.net)
6. Updated create model button and tooltip instead inline text
7. Enabling gzip to save traffic and improve page loading performance
8. Zooming on spots possible
9. New cache system (automaticaly visible changes after new release)
10. Fixed due date selection in every system locale (language format)

Deployment on 19.11.2015

1. Completely new stable issue (topics) list
2. Show current status of model processing (reliable statuses during upload/processing)
3. Dynamic centre of model rotation
4. Delete single measurement
5. Show measurement labels only on hover of dimension line
6. Export all project issues (topics) to excel
7. Removed notifications for issues created by me
8. 30+ bugfixes

Deployment on 03.11.2015

1. Export single issue to BCF file
2. Download or share exported BCF
3. New public download page for BCF (like Dropbox)
4. Bugfixing of property manager (attributes manager)

Deployment on 31.03.2015

1. Stability of the Web Explorer has been improved by the implementation of Application cache (It means the end user will not have any more problem with the caching as the client-code source files will be updated on every deployment)
2. Web Explorer & the API supports BCF_Topics_Update with BCF Import.
3. The object selection speed has been improved in the Web Explorer.
4. The performance of the Object Navigator has been improved in the Web Explorer.
5. Web Explorer's center pane "Transparency" functionality has been replaced with "Hide"
6. Revision loading performance has been improved in the Web Explorer.
7. Some critical bugs fixed (such as limitation on number of points on Polygon in a model, UX issues etc)

Deployment on 05.03.2015

1. iPad version for loading mega models has been submitted to the app store
2. The first version of the "Object Navigator"(filter for objects) is released.
   i. Pre-defined filters which works in a combination with model layers.
   ii. Filtering and object grouping performed over the visible set of objects configured via the model topology(tree)
   iii. Easy to use color picker for displaying different group of objects filtered via the Object Navigator with different color.
3. Revisions for storing and viewing the different state of the model
   i. Allowance to create or replace an existing version
   ii. Select and view a particular revision of the model
   iii. Download the latest revision
4. Importing topics to Bimplus via BCF file
   i. Topics and spots are created out of the BCF file
   ii. All the features available to the topics created via web explorer are available to the imported BCF topics as well
5. Restructured the model and layer such that it is clear for the user. Now the user can make the complete model visible or invisible.
6. Ability to select multiple objects at the same time and work with it.
7. No automatic first model load during the loading of the web explorer. This is to allow the user to select the model that he would like to view.

Deployment on 15.01.2015

1. The mega model loading speed of iPad Explorer has been improved by a big factor.
2. Web Explorer now runs quite smoothly with all the features in IE 11. Also, the mega models now load quite quickly in IE 11.
3. Model loading problem in Safari fixed.
4. Loading of models whose import is not finished was causing troubles. This is now fixed.
5. Ability to simultaneously import/upload multiple models in a project.
6. Some more properties are now included during IFC import.
7. General performance improvement during first time model loading (client irrespective)
8. Other critical internal bug fixes.
