

Bauwerksmodell in den BIM Explorer laden

To assess planning states and perform tasks, you load the entire building model of the project into BIM Explorer.

To load the building model of a Bimplus project into BIM Explorer

This is only possible if ...

You are signed in to the **BIMPLUS** web portal (see "[Signing in to the BIMPLUS web portal](#)")
You are a member of the Bimplus project

1. Make sure the required project is the current project (see "[Selecting the current Bimplus project](#)")
2. Select the navigation menu by clicking  **Show navigation menu** on the title bar of the **BIMPLUS** web portal.
3. Click  **BIM Explorer**.
BIM Explorer starts, loading all specialist models of the project.
4. Show the required specialist models or building parts as described in "[Specifying what to display and how](#)".
