

Revisionsfassung eines Modells auswählen

If a specialist model has several revisions, you can see the  symbol in the **MODELS** area of the **Project navigation** palette. In this case, you can choose the revision that you want to display in full view.

To display a revision of a specialist model in full view

This is only possible if ...

The Bimplus project is loaded in BIM Explorer (see "[Loading the building model into BIM Explorer](#)")
The **Project navigation** palette is open (see "[Showing the Project navigation palette](#)")

1. Go to the required specialist model and click  **Show revisions**.
A pop-up menu shows the available revisions.
2. Click the revision that you want to display in full view.
